Score	74.6%	72.83%

PROJECTS

Designing website using PHP | 06 Month(s)

- We have design a departmental markbook system using PHP, where the students having backlogs can check their mid-term marks before reappearing for the exam.

Designing a classification algorithm | 6 Month(s)

- We have designed a suitable classification algorithm using ID3 algorithm to solve the dynamically changing dataset.

Websites built using wordpress

- Janta Foundry (<https://jantafoundry.com/>) : Its an wordpress website made using Wordpress Elementor and custom CSS. It is a single page website.

- Noble touch (<https://nobletouch.in/>) : Its an wordpress website made using Elementor and also some custome codes. Also used custom CSS to meet some design needs. Custom JS is also being used. Here Payment Gateway is also included. It is a multiple page website.

- Intelli-AI (<https://intelli-ai.com/>) : It is also an wordpress website but it was completely made with custom codes we have also used bootstrap, custom css and custom JS to meet the design needs. It is a single page website.

- Providentia (<https://providentiatech.ai/>) : Its an wordpress website completely made by me using wordpress elementor and some custom CSS/Javascript to meet some design needs. It took me around 20days to complete since there were multiple pages.

- CISRO (<https://cisrohospital.in/>) : It is a wordpress website for an Hospital so it was a large website. We worked in a group to complete the website. I worked in some of the parts, Like Book appointment Modal, Doctors, Specialities, Services, Contact Us, and some parts in the homepage. There were many changes to be done when the project was handed to me.
